SEPTEMBER RAIN IS SLIGHTLY NORMAL AVERAGE

Temperatures Remained Comparatively Even From Day to Day and a General Excess in Precipitation.

The general weather summary for.

September, 1911, was a wacm and fairly set month induite for the factor of marked variations in temperature, out the the neutral absence of damagcomparatively even from day to they, and more of the platinis had a comparatively would range in temperature. in the month. A study come period, wins during the last is vents has it which was however. In general action of the strict on the such a second on the such a second one is the such a second one is the such and the month ended with cooler weather. But is no necessary for section of the such and the month of the second research of the second of the such and the month of the second prolonged. There was an excess of temperature generally, with the second prolonged. There was an excess of temperature generally, with the complete of a person ward along the 14th 16th and 17th and 37 benting on the 5th and 17th and 37 benting on the 5th and 10th the lawest recorded was 24 degrees at Elizabeth own on the 21st. The greater bentium of occurred. The excess in the second second of the second secon counties amounted to a degree or while the greatest local daily range more a lay tracking a maximum of was 52 degrees at Elizabethtown on more a in reaching a maximum of three of the degrees at the statement of the degrees and the lower Rin Graphic walleys, and the lower Rin Graphic walleys, and the lower Rin Graphic walleys, and the maximum parties of the month, although the minimal recorded variously from the statement of the territory. On the other hand, the lowest temperature mass commonths occurred on the last most commonly occurred on the 21st, month, and 1.19 inches above the rain-although a rew localities recorded the tall of September, 1910. The greates lowest locally on the 1st, 11th, 18th n nount was 3.55 inches at Clouderoft

in the 20th, 23d and 29th.

The valuable of the month averaged within the least 0.27 inch at Newman shightly above normal. Four rather areatest in any 24 hours was 2.51 inchest, from the 3rd to the 5th; the diest of the 0.0th, the smooth from the 8rd to the 5th; the first from the 14th to the 20th, and the hast, from the 25th to the close of the month. The central and the north western counties quite generally had an excess in precipitation, while the extremer southern, then north-executing the counties quite generally had an excess in precipitation, while the excess in precipitation was seven. The district area southern, then north-executing the counties of the southern stern showed a slight cheiency, greatest in the lower Rie. deficiency, greatest in the lower Ric Granda culter and in localities in Col-DEMING COUNTRY IS

Made by America's most noteworthy tailors. Underwear, Shirts, Pajamas. Dunlap Hats, Hawes Hats, Stetson Hats.

MANDELL

Until 100 Lots Are Sold

10% Down and 5% a Month Without Interest or Taxes

I will offer 100 lots only, your selection, out of the five hundred unsold in the TERRACE ADDITION, at the above liberal terms and discounts from the regular selling prices that have been in force for the past three years, and from which \$30,000 worth have been sold at map prices.

This addition is close in, all between the State University and the business section. Overlooks the Rio Grande Valley for miles and is undoubtedly the coming residence section of the city.

A glance at a map of Albuquerque shows that the city's growth must be eastward and as Albuquerque will steadily grow to a large sized city---don't make any mistake about that --- these lots from a purely speculative basis are a fine investment. I have a few city maps for outside purchasers, showing the TER-RACE ADDITION in full.
